Disclaimer:

The success of the conversion is largely based on the data provided. Please be aware that not all data will be transferred. Information that is incorrect or corrupt in your previous system will not be corrected by the conversion. Therefore, some information will need to be manually entered. Verification of conversion data is dependent on supplied fax documents by end user.

Special Conversion Considerations:

Conversions are in constant development. In the event you have questions about data being converted or require special consideration, please contact your XLDent[™] Representative.

Items that do not convert:

Specific areas that will not convert include, but are not limited to, the following:

- ⊙ Periodontal Charting
- ⊙ Provider Accounts Receivable Distribution
- ⊙ Payment Plans/Contract Balances
- ⊙ Referrals
- ⊙ Prescription Listing
- ⊙ Patient Prescriptions
- ⊙ Benefit Plans / Allowed Amounts
- ⊙ School Name
- ⊙ Progress Notes
- ⊙ Archived and Inactive Patients
- ⊙ Notes

Below are some notes concerning some of the items that will or will not be converting.

Patient ID

A new patient identification number will be assigned for all patients. The patient id number in your previous system will not be converted.

Gender

When this is not converted or not entered into current system it will default to Male.

Marital Status

When this is not converted or not entered into current system it will default to Other.

Responsible Party ID#

Responsible party is determined by 1st family number found during conversion process. Patients will need to be manually transferred to the correct Responsible Party after the conversion.

Preferred Dentist

When this is not converted all patients will be assigned to the default Doctor.

Preferred Hygienist

When this is not converted all patients will be default blank.

First Visit Date

When this is not converted or the patient does not have a first visit date, it will be assigned to the date of the conversion. This is done so the New Patient Report will be accurate for new patients entered into XLDent[™]. This can be manually changed.

Appointment Category on Appointment

When this is not converted the Appointment Category and Notes area will be blank. This can be manually updated after the conversion.

End of Month and End of Year will be processed during the conversion. You will be starting a new month and a new year after the conversion. You will want to maintain the End of Month and End of Year totals or reports from your previous system. At the end of the actual month and year, you will combine the totals from XLDent[™] and the totals from your previous system to get an accurate Month to Date and Year to Date total.

If posting after conversion cutoff date in your existing practice management software, reports will be inaccurate for End of Month and End of Year due to duplicate entry.

Actual Data varies from dataset to dataset, visual representation may be different.
